Location: Iranian studying Seismology in Norway

Comments: Hi,

I deeply appreciate your work and I prefer to tell the story. I was familiar with your works since one of your predictions in 1999?. When on the Dec. 26th, I received the news about the event, I was so confused that I could not think properly. I had a map of the region against me; suddenly it came to my mind one of your predictions about the same region, which was posted in 1999. Actually I had discussions with my colleagues about that prediction. I also discussed that earthquake with you. Anyway, immediately I referred to your website for searching that prediction. When I saw your recent prediction, I was shocked. As an Iranian seismologist, I deeply admire the great prediction.

Best regards,

Mohammad Raeesi
